

PROJEX®

YOUR GP @DENMAN

Your GP @ Denman

OVERVIEW

Projex was engaged to undertake the medical fit-out of the "Your GP @ Denman" in the newly-constructed Denman Shopping Centre. The curved building with racking ceilings presented a few major difficulties during the 10-week construction period. The GP included nine practice rooms, two nurses' stations, an operating theatre, and a pathology room.

KEY CHALLENGES

The fit-out works were completed in 10 weeks by pre-ordering all furniture, fixtures, and equipment and building walls to predetermined dimensions to allow for joinery manufacturing and ordering of long-lead items.

Since many high-end architectural items had long lead times, cost and time management were necessary to meet the project's deadlines and budget. Projex's ability to find alternate construction methods and substitute materials resulted in a successful delivery, meeting the client's objectives without compromising the architectural vision.
