ACT DRAGON BOAT FACILITY CONSTRUCTION

OVERVIEW

On behalf of the ACT Government, Projex constructed the new ACT Dragon Boating Facility at Grevillea Park on the shores of Lake Burley Griffin.

The new facility included boat storage, training and timekeeping rooms, administration space, gym, change room and bathroom amenities.

KEY CHALLENGES

A key challenge for the project was the stormwater design and overland waterflow management. With a shallow stormwater tie, careful management of external grades and finished floor levels was required to balance achieving AS1428.1 complaint access, sufficient internal stormwater drainage fall and management of overland waterflow travelling to Lake Burley Griffin.
